## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of group II (including claims 13-22) in the reply filed on June 24, 2005 is acknowledged.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Watanabe et al. (US 5,340,968).

Regarding claim 1, Watanabe et al. et al. disclose a label in the form of a delivery slip (201) between whose opposing major surfaces (211, 217) a thin radio frequency identification (RFID) package (202) operative to receive RF signal from an interrogator and store data therein in a memory (224) and further being operative to transmit this data identification signals (figures 34-35 and col. 27, line 50 through col. 28, line 37).

Regarding claim 2, Watanabe et al. further disclose the RFID package being electrically powered by a battery cell (203) and connected to a thin integrated circuit transceiver chip (204) to which a planar antenna (205) is coupled (figure 35, col. 28, line 33 through col. 29, line 2).

Regarding claim 3, refer to claim 1 above.

### ***Allowable Subject Matter***

6. Claims 4-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
